CHANDRASHEKHAR

MERN Stack Developer

Nashik, India| +91 9322536242 | cbillade@gmail.com

GITHUB | **LINKEDIN**

OBJECTIVE

A passionate and motivated BCA graduate from Sandip University with a strong interest in MERN stack web development. Skilled in building responsive and dynamic web applications. Eager to contribute to a forward-thinking organization by applying my knowledge of JavaScript, Python, and Java.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js
Backend: Node.js, Express.js
Database: MongoDB, MySQL (Basics)
Languages: Python, Java, C (Intermediate)
Tools: Git & GitHub, VS Code, Postman
Soft skills: Adaptability, Collaboration, Time Management, Active Learning
Libraries: OpenCV, NumPy, face_recognition (Python)

EDUCATION

Bachelor of Computer Applications **2022-2025**

PROJECTS

Prime Lab

Prime Lab, a comprehensive diagnostics website that allows users to book and manage medical tests.

- Allows users to easily book and manage medical tests, ensuring they can find and secure appointment slots conveniently.
- Provides distinct user and admin dashboards for streamlined management of appointments, test results, and user information, enhancing overall efficiency.
- Gives administrators the ability to efficiently manage tests, users, and promotional banners, ensuring up-to-date and relevant service offerings.

Technologies Used: React , Tailwind, JavaScript, Express.js, Node.js, MongoDB, Firebase, JWT, Stripe

AttendPlus

AttendPlus is a attendance system which uses a webcam to capture the faces and marked them for the attendence.

- Developed a face detection-based attendance system using Python.
- Automatically recognizes faces from a webcam feed and marks them as present or absent.
- Stores attendance data with time and date in a CSV file or database.

Technologies Used: Python, OpenCV, face_recognition, NumPy, Pandas, Tkinter, CSV module, SQLite

Smart Plant Growth Tracker

Smart Plant is a AI based based monitoring app which uses for deseas detection.

- Built an AI-based solution for monitoring plant growth stages from seeding to maintenance using Python and image processing tools.
- Integrated data collection and visualization for analysis.

Technologies Used: Python, OpenCV, NumPy, Matplotlib, Pandas, Tkinter, CSV module, Datetime module

CERTIFICATIONS:

- **Infosys Springboard- Complete Front-End Journey**
- **Nasa International Space app Challenge Certificate**

HOBBIES AND INTERESTS
